

Write some code to create a txt file which will contain the File Content indicated. Your code could be different to the Suggested Code (see Python lesson), while achieving the same output to the file.

**Predict code to achieve the File Content indicated**  
**- Test out your code in your IDE to verify -**

File Content	Suggested Code
A haon	<div style="border: 1px solid black; border-radius: 15px; padding: 10px; text-align: center;"> <i>Hint : myFile = open("Test File.txt", 'w')</i> </div>
A haon A dó	<div style="border: 1px solid black; border-radius: 15px; height: 100px;"></div>
<pre>A haon = "One" A dó = "Two" A trí = "Three"</pre>	<div style="border: 1px solid black; border-radius: 15px; height: 100px;"></div>
